As a detail-oriented Full Stack Developer, I am dedicated to delivering high-performance applications through innovative and scalable solutions. My experience spans various sectors including finance, digital marketing, and healthcare, where I prioritize security and user engagement. With a proven track record of building robust systems, I continuously strive to exceed client expectations and enhance operational efficiencies.

EXPERIENCE

- ✓ **Full Stack Developer**
  Valuete, Mumbai
  October 2025 – Present
  - Building a secure Bitcoin-backed lending platform with blockchain-based collateral management.
  - Developed scalable backend services and REST APIs for lending workflows, LTV monitoring, and liquidation processes.
  - Designed and implemented responsive UI for onboarding, lending dashboards, and multisig wallet interactions.
  - Integrated Bitcoin blockchain for transaction validation and real-time collateral tracking.
  - Strengthened platform security using multisig architecture and robust authentication mechanisms.
  - Built analytics and reporting systems to support risk assessment and business decision-making.

- ✓ **Full Stack Developer**
  UnoiaTech, Mohali
  October 2024 – July 2025
  - Developed and optimized web applications to improve performance and user engagement.
  - Enhanced UI/UX for responsive design, accessibility, and seamless cross-device experience.
  - Integrated data analytics and reporting tools to enable data-driven decision-making.
  - Built scalable backend systems and APIs supporting business-critical operations.

- ✓ **Full Stack Developer**
  DataBoxStudio, Mohali
  January 2021 – September 2024
  - Developed and maintained scalable full-stack web applications, focusing on performance, maintainability, and clean architecture.
  - Designed and implemented RESTful APIs and backend services using Node.js and Express.js.
  - Built reusable components and scalable architecture using React.js and Next.js.
  - Integrated third-party services including payment gateways, analytics tools, and external APIs.
  - Maintained high code quality through Git-based workflows, peer reviews, and best practices.

- ✓ **Junior Quality Analyst**
  Matrix Marketers, Mohali
  August 2018 – December 2020
  - Executed test cases and identified defects to improve product quality and reliability.
  - Evaluated performance and quality metrics to identify bottlenecks and improve system efficiency.
  - Created and maintained QA documentation, test plans, and procedures.
  - Collaborated with developers to resolve issues and enhance system performance.

EDUCATION

- ✓ **Master of Computer Applications, 2017**
  IGNOU, New Delhi
- ✓ **Bachelor of Computer Applications, 2014**
  GNDU, Amritsar

CERTIFICATIONS

- ✓ **Certified Tester Agile Tester Foundation Extension, 2019**
  International Software Testing Qualification Board
- ✓ **Certified Tester Foundation Level, 2018**
  International Software Testing Qualification Board

PROJECTS

- ✓ **Valuete – Bitcoin Lending Platform**
  Role: Full Stack Developer
  Technology Used: NodeJS, NextJS, MongoDB, Prisma, Web3, Bitcoin Blockchain
  - ➢ Built a decentralized P2P lending platform where borrowers can obtain loans using Bitcoin as collateral.
  - ➢ Implemented secure wallet integrations and Bitcoin blockchain transaction reading for collateral verification and monitoring.
  - ➢ Developed core lending workflows including collateral locking, LTV monitoring, repayment tracking, and liquidation flow.
  - ➢ Designed scalable backend APIs and real-time systems ensuring secure, transparent, and efficient lending operations.

- ✓ **InstaAcquire – Digital Marketing Platform**
  Role: Full Stack Developer
  Technology Used: NodeJS, NextJS, MongoDB, Prisma
  - ➢ Provides data-driven digital marketing services, including SEO, PPC, and social media management.
  - ➢ Specializes in crafting custom strategies for business growth through innovative digital marketing solutions.
  - ➢ Expertise in e-commerce, B2B/B2C, and local business marketing for diverse industries.
